NATIONAL ENGINEERS WEEK

National Engineers Week is an annual event to raise public awareness of engineers and the work they do. Founded in 1951 by the National Society of Professional Engineers, (NSPE), it is among the oldest of America's professional outreach efforts. For Engineers Week 1990, DiscoverE issued the first nationwide call to engineers to visit a classroom and introduce K-12 students to engineering. To celebrate this important milestone, Chattanooga E Week invest in programs and activities offering engineering experiences.
